🚀 Architecture & Deployment

Security

Learn about security in the context of web applications, server management and deployment.

Table of contents

There's not much here, but we will illustrate various security concerns with practical analysis and demonstrations during the course.

OWASP

The **O**pen **W**orldwide **A**pplication **S**ecurity **P**roject (OWASP) is a nonprofit foundation that works to improve the security of software, enabling organizations to conceive, develop, acquire, operate, and maintain applications that can be trusted. All of their projects, tools, documents, forums, and chapters are free and open to anyone interested in improving application security.

The top ten

The OWASP Top 10 is a standard awareness document for developers and web application security. It represents a broad consensus about the most critical security risks to web applications.
